

AT A GLANCE

- » PATENTED SCHEDULE-OPTIMIZING TOOL, SET IT AND FORGET IT
- » 10% MORE KEPT APPOINTMENTS, UP TO 95% OF AVAILABLE
- » MORE PATIENTS SEEN EACH DAY
- » FULLY INTEGRATED WITH ATHENANET

Our practice has worked with Kairoi for nearly 2 years. KairoiOptimize has significantly increased the number of completed encounters, adding revenue for our practice. It has smoothed out our providers' workflow, thereby improving their job satisfaction. It is truly "set it and forget it." Great people to work with.

LYNN HOPKINS, CEO
PrimeCareHealth

Cherry Health has collaborated successfully with Kairoi Health to implement its solution at our health center. I don't hesitate to recommend Kairoi to any healthcare organization seeking actionable, data-driven perspectives that can help maximize clinic productivity and patients' access to care.

TASHA BLACKMON, CEO
Cherry Health

There is little doubt that the approach taken by Kairoi will improve both efficiencies and effectiveness of healthcare organizations. . .

S. MICHAEL BURRITT, PRACTICE MANAGER
GVSU Family Health Center

KairoiOptimize Watches Over Late Cancellations and No-Shows and Responds by Adding Slots for Backup Patients to Replace Them.

Lost productivity reduces clinic revenue, upsets provider's workflow and more. A 2019 *McKinsey & Company* report, "[The Productivity Imperative for Healthcare Delivery in the United States](#)", zeroes in on the need to access providers' "additional existing capacity." According to the report, physician schedules average only 78–82% of capacity (with primary care on the low end).

KairoiOptimize increases the number of kept visits to your clinic. Based on the metric McKinsey used in its analysis, clinics using Kairoi's tools have achieved >90% productivity.

HOW IT WORKS

See pattern illustration on p. 2

KairoiOptimize analyzes your appointment histories to find the patterns of late cancellations and no-shows in each provider's panel. Our patented process uses this information to determine where additional slots should be added to their schedules to bring backup patients to compensate for those being lost. Continuous analysis keeps up with changes in the patterns and our reporting makes you aware of the progress.

INTEGRATED WITH ATHENANET

KairoiOptimize is fully integrated with athenaNet. After setup appointment data is collected and analyzed, and the backup slots are added to providers' schedules, the modified schedule is available in athenaNet for booking.

SET IT AND FORGET IT

Set up the application parameters during two 1-hour zoom calls a week apart. After that, no more to do, nothing to learn, the application works as directed. All Kairoi support staff is U.S.-based and ready to answer questions. Servers are HIPAA-compliant on Microsoft Azure.

+23%

For a Primary Care Clinic
Kairoi created a scheduling optimization strategy that increased capacity by 23%.

BENEFITS OF KAIROI OPTIMIZE

Our patented process finds the pattern of no-shows and late cancellations in each provider's panel. Kairoi's optimization engine uses this information to add backup slots for patients to fill these holes. Providers don't lose time waiting for patients who don't come. Their workdays flow better, reducing burnout and turnover, and patients get appointments sooner.

EASY SET UP

Guided setup during two 1-hour zoom calls. Our SaaS solution requires no additional staff time.

DATA-DRIVEN

Schedules based on validated patterns, not estimates. Reporting identifies best practices to implement clinic-wide.

PATENTED DATA CLEANSING

Kairoi process compensates for data-entry errors, producing accurate appointment records for schedule optimization.

AUTOMATED OPERATION

Backup appointment slots are added each month to next month's schedules. No additional work for practice managers.

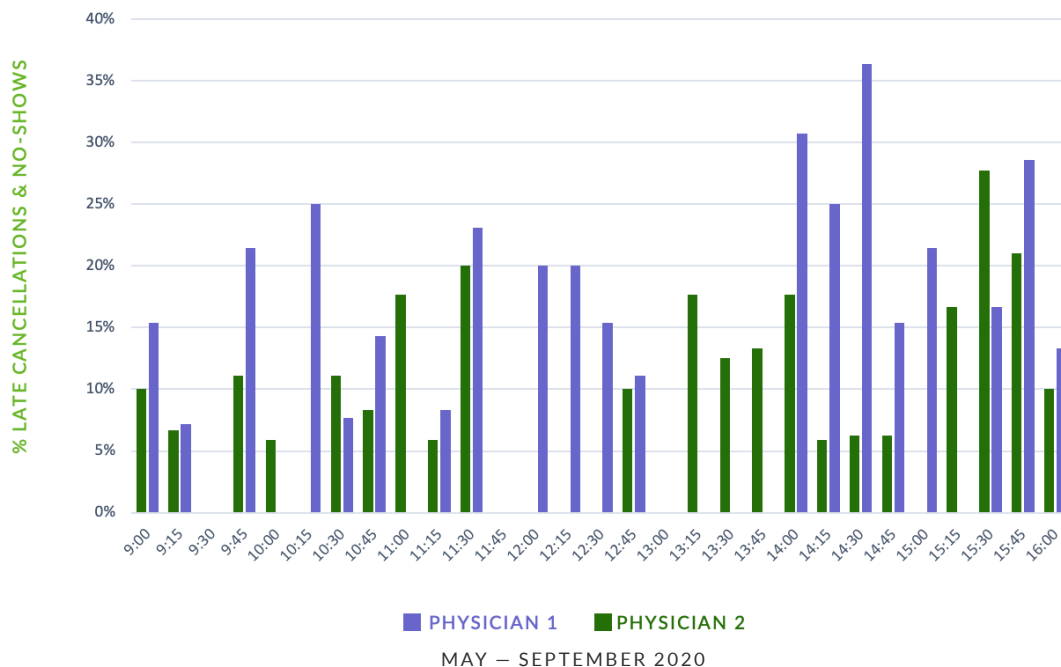

ATHENANET INTEGRATION

Fully integrated with athenaNet. Needs no additional data entry by provider.

LATE CANCELLATIONS AND NO-SHOWS
